da Vinci® Surgery: Minimally Invasive Surgery

If you've been told you need surgery, you may have several options to consider. One minimally invasive option is *da Vinci* Surgery.

Find out why many patients and surgeons choose *da Vinci* Surgery, and learn about the [clinical evidence](#) supporting its use.

The *da Vinci* System has brought minimally invasive surgery to more than 3 million patients worldwide. *da Vinci* technology – changing the experience of surgery for people around the world.

da Vinci Surgery is used for:

- ▶ [Cardiac Surgery](#)
- ▶ [Colorectal Surgery](#)
- ▶ [General Surgery](#)
- ▶ [Gynecologic Surgery](#)
- ▶ [Head & Neck Surgery](#)
- ▶ [Thoracic Surgery](#)
- ▶ [Urologic Surgery](#)

What is da Vinci Surgery?

With the *da Vinci* Surgical System, surgeons operate through just a few small incisions. The *da Vinci* System features a magnified 3D high-definition vision system and tiny wristed instruments that bend and rotate far greater than the human hand. As a result, *da Vinci* enables your surgeon to operate with enhanced vision, precision and control.

The *da Vinci* System represents the latest in surgical and robotics technologies. Your surgeon is 100% in control of the *da Vinci* System at all times. *da Vinci* technology translates your surgeon's hand movements into smaller, precise movements of tiny instruments inside your body.
